About me

Recently graduated programming student at Holberton School Uruguay, with a strong understanding of foundational concepts in the field, as well as a prevailing desire to continue growing professionally in the IT industry.

I am passionate about Front-end development, as well as UX/UI design.

I consider myself a passionate individual, with a grand affinity towards interpersonal relationships and teamwork.

My greatest motivation is to be part of groups of people with whom I can exchange ideas and knowledge for the purpose of mutual enrichment at a professional and personal level.

Formation

Holberton School Uruguay

Foundations of Computer Science (February 2023 - November 2023)

At Holberton, I had the opportunity to learn the foundations of computational logical thinking, as well as the importance and strengthening aspects of teamwork within the industry. Thanks to the institution's learning methodology, I was able to develop the skills required for independent learning of new technologies and tools essential for advancing my career in the IT industry.

Escuela de Actuación Integral (EAI)

Acting

Having studied for two years at EAI, I was able to acquire acting skills that, despite their distance from the IT industry, have cultivated a strong affinity for soft skills associated with it. These include adaptability, quick understanding of other people's ideas, ease of expression, among other various oratory skills.

Projects

IRIS

October 2023 - November 2023

Final project of my journey at Holberton School. Iris is a platform designed to provide a comprehensive solution for small and medium-sized businesses that operate through appointment bookings.

Skills:

- Front-end Developer.
- User Experience designer (UX/UI).

Learnings:

- Handling deadlines and time management..
- Communication and support among peers.
- Effective and autonomous learning.
