About me

Programming student with a strong understanding of foundational concepts in the field, coupled with significant soft skills.
I have a keen interest in user experience design and front-end development.
I am a passionate individual who enjoys leaving a personal touch in everything I do.
Currently seeking my first professional opportunity and looking forward to further expanding my knowledge.

Formation

Holberton School Uruguay
Foundations of Computer Science (February 2023 - November 2023)

At Holberton, I had the opportunity to learn the foundations of computational logical thinking, as well as the importance and strengthening aspects of teamwork within the industry. Thanks to the institution's learning methodology, I was able to develop the skills required for independent learning of new technologies and tools essential for advancing my career in the IT industry.

Escuela de Actuación Integral (EAI)
Acting

Having studied for two years at EAI, I was able to acquire acting skills that, despite their distance from the IT industry, have cultivated a strong affinity for soft skills associated with it. These include ease and fluency in public speaking, projecting confidence when presenting, and more.

Projects

IRIS
October 2023 - November 2023

Final project of my journey at Holberton School. Iris is a platform designed to provide a comprehensive solution for small and medium-sized businesses that operate through appointment bookings.

Skills:
- Front-end Developer.
- User Experience designer (UX/UI).

Learnings:
- Handling deadlines and time management..
- Comunication and support among peers.
- Effective and autonomous learning.
